I did it all just for her I did it all just for her And love's heart is death For me and my poison girl

A prey she was for the cruelty of love While its serpent inside crawled straight towards her heart The coldest kiss love ceased to exist While we grew apart like never before

I did it all just for her I did it all just for her And love wants us dead Just me and my poison girl

I did it all just for her I did it all just for her And love's heart is death For me and my poison girl

the fire in her eyes grew dim and then died as the poison inside reached her heart

And the coldest kiss faith ceased to exist as we grew apart like never before

I did it all just for her I did it all just for her And love wants us dead Just me and my poison girl

I did it all just for her I did it all just for her And love's heart is death For me and my poison girl

And the taste of the poison on her lips is of a tomb

I did it all just for her I did it all just for her And love wants us dead Just me and my poison girl

I did it all just for her I did it all just for her And love's heart is death For me and my poison girl

Poison girl [4x]

And love's heart is death For me and my poison girl The this polyson world
