

To Be With You

Hoobastank

Make me feel again
Slide across my skin again
Let me uncover you
To rediscover you

And I will open up
If you promise to give in
On this perfect night
Let the two of us be one

We will be again another time
No matter what all the others say
'Cause I would leave it all so far behind
Just to be with you today

So make me feel again
Feel your every breath again
Never mind everyone
There's only me and you

We will be again another time
No matter what all the others say
'Cause I would leave it all so far behind
Just to be with you today
Just to be with you today
Just to be with you today
Just to be with you

We will be again another time
No matter what all the others say
'Cause I would leave it all so far behind
Just to be with you today

So we will be again another time
And I will do all I need to do
To leave the others all so far behind
Just so I can be, just so I can be
With you, with you, with you, with you
With you, with you, with you
