

My Uzi Holds a Hundred Round Conscience

I Set My Friends on Fire

Yeah I'm on some loose cravings
On my last baggy
Dug into the last of my savings
Mary so good gonna need some ear plugs
Who said a synthazoid can't enjoy drugs?

Trying to catch me in a good mood
(Always in a good mood)
Is like trying to catch a shark on a day it can't find food

If you're confused about where you're placed
I'm going to have to reach for my waist
I don't usually do this in the daylight
With your kids right
There

I was fucking high then I shrunk
What did you put in the blunt?
I needed to take off the edge
I think I'm jumping off this ledge

Yeah your boy finally slept
There's things I've done I just can't except
You give my name a bad rep
If you're walking towards my front door
Better watch where you step

If you're confused about where you're placed
I'm going to have to reach for my waist
I don't usually do this in the daylight
With your kids right
There

When you thought that things couldn't get worse
Gonna take you for a ride in your very first hearse

I'm going to bury this with you [x2]

If you're confused about where you're placed
I'm going to have to reach for my waist
I don't usually do this in the daylight
With your kids right
There
