Icon for Hire

They tried to bury us
They didn't know we were
Seeds
Seeds
Seeds
They didn't know we were
They didn't know we were

It's been a rough start
Been a rough start
All this got me feeling displaced
They keep us in the dark
Keep us in the dark
But I get this feeling it's about to change

While they've been pushing us low
We've been making this grow
We know something they don't
Gonna reap what they sow

They tried to water us down
Just gave us what we need
Shoved us underground
It just set us free

They tried to bury us
They didn't know we were
Seeds
Seeds
Seeds
They didn't know we were
They didn't know we were

From the ashes
From the mud
We just keep climbing on up
Started grass roots and now we're everywhere
Spreading like wildfire
Spreading like wildflowers

While they've been pushing us low
We've been making this grow
We know something they don't
Gonna reap what they sow

They tried to water us down
Just gave us what we need
Shoved us underground
It just set us free

They tried to bury us
They didn't know we were
Seeds
Seeds
Seeds
They didn't know we were
They didn't know we were

We'll go up in flames
And down in history
As the ones who break through to find the sun
We'll go up in flames
And down in history
As the ones who break through to find the sun
We'll go up in flames
And down in history
As the ones who break through to find the sun
