

The Only Thing I Ever Got Right

Ilse DeLange

I've fallen down a million times
Been at a loss following through
So many wrongs that wrecked my life
The only thing I ever got right was you

So many diamonds made of stone
I found more lies than I found truth
Still there's a truth inside my bones
The only thing I ever got right was you
The only thing I ever got right was you

I can only wonder, if I wonder in my mind
Would you and I ever make it in this world
If we stay together, would we find a true forever
Is it better that we stay that boy and girl
Young and unafraid, this way you'll always stay

The only thing I ever ever got right
The only thing I ever ever got right was you

I close my eyes and see your face
Is it a dream or just a chase
Seems like we should've seen it through
The only thing I ever got right was you

I can only wonder, if I wonder in my mind
Would you and I ever make it in this world
If we stay together, would we find a true forever
Is it better that we stay that boy and girl
Young and unafraid, this way you'll always stay
The only thing I ever ever got right
The only thing I ever ever got right was you
