

## Winter Of Love

Ilse DeLange

You're disconnected somehow,  
Live on different sides now  
Divided by the seasons weak  
Created from discarded dreams  
You let the fire burn out  
Into the ashes of doubt  
The night grows older day by day  
The north wind is on it's way!

This winter of love is falling on us  
Leaving our hearts in the cold and the darkness  
Lost in a frozen dance  
Is there still life berried under the suns?  
Is there an... of us left in the black sun?  
This winter of love!

Will the sun ever come (come to rescue us?)  
Put us back into one (put us back into one)  
Clouds give way to skies of blue  
Will we make it through?

This winter of love is falling on us  
Leaving our hearts in the cold and the darkness  
Lost in a frozen dance  
Is there still life berried under the suns?  
Is there an... of us left in the black sun?  
This winter of love!

Silent storms have left the...  
This winter of love, is falling on us  
Leaving our hearts in the cold, in the darkness  
Lost in a frozen dead

This winter of love is falling on us  
Leaving our hearts in the cold and the darkness  
Lost in a frozen dance  
Is there still life berried under the suns?  
Is there an... of us left in the black sun?  
This winter of love!
