

Another Me

In Legend

I'm easy-goin', I'm alright today!
My mind's a bird and I'm flyin' away
A thousand miles and all there is left to say:
I had a good time -
Farewell!

And day by day I used to roam at night
Along the bars, attracted by your lights
An open cage is all that's left behind
I'm leaving this place for good

Whoever we are
Wherever we're from
We might be kings and queens of somewhere else
No matter how far
Whatever may come
You'll never know unless you start on
Your way

I never used to have a backup plan
I live my dreams, therefore I am -
Come take a look up
For there's a lot (of) stars in the sky
You got to pick one as your guide

And it's got to be you
And it's got to be you
And you've got to
Be your guide... be your guide...

There's people tryin' to tell you what to do
No matter if you want to listen to
For they allegedly know
What's good for you

Whoever we are
Wherever we're from
We might be kings and queens of somewhere else
No matter how far
Whatever may come
You'll never know unless you hit the trail!
And so I follow my star
To reach out for my own kingdom
To come...

Where you go...
Take it easy...
You're gonna rule your life

Whoever we are
Wherever we're from
We might be kings and queens of somewhere else
No matter how far
Whatever may come
You'll never know unless you hit the trail
That's why I follow my star
And and carry on to where i do belong

Wherever you are
The kingdom's your heart
We're all kings and queens from the start
