

# Synthesizer

## Information Society

You can feel the pain  
You can't leave me down this way  
You can fill my days of hollow  
With your inadvertent gray

I can  
Live beside you  
Reunite you  
Un-divide you  
Dwell inside you  
Find the real you  
Make it come true  
Force the good through  
Only for you

You are my synthesizer  
Emulate my skin  
You are the only one  
Who understands this constant state I'm in

You can't bring me down  
Where I know I cannot stay  
I will find the strength to tell you  
That I love you everyway
