

Rewired

Iris

Time to rise, I don't want to sleep
Give me light and send me on
Voiceless souls that I want to free
Send me out and keep me strong

From now on
There's a blaze
There's a light of fire
As the morning stars sang
I became rewired

And all the fears I'm ready to face
With courage I say bring it on
Here deep inside of the human race
Universe within us all

From now on
There's a blaze
There's a light of fire
As the morning stars sang
I became rewired
