

Moment in Time

Iron Savior

Down in the black hole where time's standing still
Something is lurking and longing to kill
At the edge of the universe
A forgotten beast got released
Ten thousand demons arising from hell
Walking the earth to the sound of the knell
Ancient evil is marching on and the end of days is to
overcome

Unthinkable - invincible
A power beyond believe
No escape and nowhere to run
The reaper is calling for everyone

And nothing but silence will remain
Will I ever see you again?

Take my hand for a moment in time
And for all eternity
I'll remember it by
Give me a final kiss
Time to say goodbye - Time for goodbye
I'm ready to go
The evil must die

Ten thousand heroes embarking to hell
Holding the ground - defending the realm
At the edge of the universe
They'll boldly stand till the end

Unthinkable - invincible
A creature beyond believe
I will fight for our love to survive
The reaper must wait till another life

And from the ashes of the storm
Our love will be reborn

Take my hand for a moment in time
And for all eternity
I'll remember it by
Give me a final kiss
Time to say goodbye - Time for goodbye
I'm ready to go
The evil must die

I will return
From the other end of the universe
To save and protect you
To keep you from harm
To hold you
Hold you tight in my arms
