

Stay Here

Isak Danielson

I don't like to be alone, my darlin' I need someone, hmm-hm
I'm hurt inside, since you left me you've been running wild, wild

What have you done with my love?
What have you done with my love?

Stay here and I will show you
Every part of me is wanting to be lyin' next to you
Don't think, just let me show you
How amazing we could be together
No more time to waste

The future will tell, if it's meant for us to be something, mmh-hm
I know just what I want, and you are everything I've ever wanted

What have you done with my love?
Tell me what you have done with my love

Stay here and I will show you
Every part of me is wanting to be lyin' next to you
Don't think, just let me show you
How amazing we could be together
No more time to waste

When I'm feeling lost you come and find me
When I've had enough you sit beside me, and say
Don't think, just let me show you
How amazing we could be together, there is no more time to waste
