

Disasterpiece

Jackyl

Come face to face with a devil that's inside
Find out if you can handle and are ready for the ride
Shout out the voices as they're shouting back at you

Try to drew look at you
You're holding out for reason will only change your point of view
It's my disasterpiece and I can show you everything and even more if you step onto my stage
My disasterpiece look out below the sky is falling around your feet use my raging paints
My disasterpiece

If I could take a look the stars will tell the tale
The lines have gotten deeper it's the package that you sell
With a hand held to the sky you can swear you never knew

Try to drew look at you
You're holding out for reason will only change your point of view
It's my disasterpiece and I can show you everything and even more if you step onto my stage
My disasterpiece look out below the sky is falling around your feet use my raging paints
My disasterpiece

How much can you handle strap yourself in now it's your turn to ride
I can crank you up to eleven drop you from a roof drop you inside
Watch the spike my thirst cut off my nose move over [?] I'm trying to drew
It's my disasterpiece
Throw away your one way ticket the bell's already rang
For the one who screams the loudest for every song you sing
Come face to face with the devil that you know

Try to drew
You're holding out for reason will only change your point of view
It's my disasterpiece and I can show you everything and even more if you step onto my stage
My disasterpiece look out below the sky is falling around your feet use my raging paints
My disasterpiece and I can show you everything and even more if you step onto my stage
My disasterpiece look out below the sky is falling around your feet use my raging paints

My disasterpiece
