

Sleep With Me

Jacob Latimore

Sleep wit me
Oh come lay by my side
And when you come over girl
I just might sing you a lullaby
Sleep wit me
Take a break from your cries yea
You done seen a lot in the world
You need to relax your mind

Lay your body down and focus on your inner peace
Let the rain come down and heal you with its energy
Lay your body down and focus on your inner peace
Let the rain come down and heal you with its energy
Let the rain come down and heal you with its energy

Let's just lay here
All I wanna do is lay here
Let the rain in
And be here right next to you all the nights like this
Stay here
Baby can both of us stay here
Let's just lay in
Cuz really girl I can spend all of my life like this
When the rain it gets the pouring I'ma be right here
I got no beef with the sunshine
But days like this with my lady
I wanna feel like this
Sunshine sunshine in my life, my life

Sleep wit me
Oh come lay by my side
And when you come over girl
I just might sing you a lullaby
Sleep wit me
Take a break from your cries yea
You done seen a lot in the world
You need to relax your mind

Meditate and let go
When you find your space you'll know
Just breathe in deep let it out
Breathe in deep let it out
Ease your mind
Ease your mind
Ease your mind
Feel it enough
Do you feel it enough
Can you feel it enough

Sleep wit me
Oh come lay by my side
And when you come over girl
I just might sing you a lullaby
Sleep wit me
Take a break from your cries yea
You done seen a lot in the world
You need to relax your mind

Lay your body down and focus on your inner peace
Let the rain come down and heal you with its energy
Lay your body down and focus on your inner peace
Let the rain come down and heal you with its energy
Let the rain come down and heal you with its energy
