## **Easy Does It**

Jake Owen

The night is early and the sky's still blue Ain't even got to where we're going to And you're nibblin' and whisperin' in my ear What you wanna do? Baby I do too

Well I don't wanna take this night too fast It's just beginning, wait a minute, let's make it last

Easy does it We're gonna take our time, girl we got all night No need to rush it Let's just kick back and relax Slow it on down, soak up this moment Easy does it

The summer sun is finally going down Parked on this back road not a soul around And we're kissing and listening to the radio When "Let's Get It On" just happened to come on Well all day long I've been playin' it cool You say, "Boy I wanna, when you gonna make your move?"

Easy does it We're gonna take our time, girl we got all night No need to rush it Let's just kick back and relax Slow it on down, soak up this moment Easy does it

Easy does it We're gonna take our time, girl we got all night No need to rush it Let's just kick on back and relax Slow it on down, soak up this moment Easy does it

Ahh, easy does it
