

Everlast

James Ingram

This is forever
Now we won't ever
Look for forever again
Hands strongly holding
Slowly unfolding
This is where ever begins

Too many moments just slip away, just slip away
This is a second where time must have stayed
We see the future embracing our past
Everlast, everlast

Inside this blessing
We find confessing
Draw away through free my soul
There's no side
No vision so right
Where the inside of young is old

Too many moments just slip away, slip away
This is a second where time must have stayed
We see the future embracing our past
Everlast, everlast

I can see a rainbow
Even if it's not there
In [?] vision
We just see the beginning that has no end
We watch the love unfolds
Again and again

Once in a lifetime
You find a love sign
That touches without any words
Spirits are calling
With voices so sweet
Then makes never ending calm
Come please

Too many moments just slip away, slip away
This is a second where time must have stayed
We see the future embracing our past
Everlast, everlast
Everlast
Everlast
