## Seven

Blow me away Was that love you declared Only a word Love can mean anything Understand the world we're living in

Oceans apart What's that view from your wave Beautiful craft Weather and change Understand the world we're living in Love can mean anything

God made love to me Soothed away my gravity Made me a pair of angel's wings Clear vision and some magic things

God is love to me Thank you for those things Understand the world we're living in Love can mean anything

Darling I'm open Unguarded Unbroken

Now we've done our time We can drift away Like the heavy cloud With the weight of rain

Understand the world we're living in Love can mean anything

Understand the world we're living in Love can change anything
