

Go With Me

Jason Blaine

It was high school around mid-November
Winter formal was in less than a week
My buddy said, "man, you should ask her"
And you said you'd go with me

We kissed on the gym floor then a thousand times more
It was two years of you and me
Then college came fast and I had to leave
I said, "Go with me"

Go with me
For now and forever
No matter wherever
This road might lead
Through the ups and the downs
And all those trips around the sun
I hope you know I don't wanna go
Unless you go with me

You had a job as a teacher
I had a guitar and a dream
I'd head outta town on the weekends
And you'd go with me
From the lights of Toronto
Highway through Ohio
To the hills of Tennessee
You left behind friends and family
To go with me

Go with me
For now and forever
No matter wherever
This road might lead
Through the ups and the downs
And all those trips around the sun
I hope you know I don't wanna go
Unless you go with me

From that old car dying
To new babies crying
To both kinds of getting no sleep
Wanna wake up with you
Like young lovers do
From now till we turn 93

Go with me
For now and forever
No matter wherever
This road might lead
Through the ups and the downs
And all those trips around the sun
I hope you know I don't wanna go
Unless you go with me
Girl I hope you know I don't wanna go
Unless you go with me
