

## Down to Earth

Jem

Friends I have to tell you  
They sent me on a mission down to earth  
To watch and to observe life  
And gather information 'bout your birth

But what I mostly see is misery  
And it makes me sad

So capable of love yet, too scared to open up and  
Just wanna be accepted, but can't show that you care  
Creating problems daily, no wonder some go crazy  
So special and so gifted, but most don't know, it's there

Friends I have to ask you  
Surrounded by the beauty of this place  
Why do you make it so hard  
For all the things you want to come your way

Well I don't think you see your destiny  
And it makes me sad

So capable of love yet, too scared to open up and  
Just wanna be accepted, but can't show that you care  
Creating problems daily, no wonder some go crazy  
So special and so gifted, but most don't know, it's there

Do it, just let it all out  
Express emotion  
Say how you're feeling  
It's liberating  
Nothing can hurt you  
You can be happy  
But you must believe it (believe it)

Well I don't think you see your destiny  
And it makes me sad

So capable of love yet, too scared to open up and  
Just wanna be accepted, but can't show that you care  
Creating problems daily, no wonder some go crazy  
So special and so gifted, but most don't know, it's there  
So capable of love yet, too scared to open up and  
Just wanna be accepted  
Creating problems daily, no wonder some go crazy  
So special and so gifted, but most don't know, it's there

Won't you let me take you down to earth
