

# All Night Long

Jerry Lee Lewis

Why ride jockey on a real fast horse  
Doin' ninety miles 'round the Derby course  
When the crazy horse begins to real and rock  
For a cute little filly in some bobby socks  
Night long, baby all night long

Real big wheel, drivin' a Cadillac  
Pull over to the curves, bend the front seat back  
Grabbed my baby, squeezed her big and strong  
I said, we're gonna be here all night long  
Night long, baby all night long

Well, up in Washington, been to the President  
When the secret service let me in on a hint  
We got sure proof, your baby done you wrong  
She's been runnin' 'round, yeah all night long  
Night long, baby all night long

Well, I freezed all pallid in an aeroplane  
Doin' three hundred miles flyin' through the rain  
Passed a cute little filly (angel) on cloud number nine  
Said, come on daddy I'm gonna make you mine  
Night long, baby all night long

I said all night long, yeah, all night long  
Now won't you say, let's to get together  
And let's have some fun all night long
