

Better

Jessica Mauboy

Little did you know I meant it
When I set my heart on you
Little did you know I meant it
I would be the one for you

Don't be shy
It's you and I
Tonight
Don't say goodbye
Take your time
Tonight

And then the world just got better
'Cause we were meant to be together
And then the world just got better
I see the look in your eyes
Let's just give it a try

The universe has taught me patience
Waiting on a love so good
Better than I ever dreamt it
Better now that I'm with you

Don't be shy
It's you and I
Tonight
Don't say goodbye
Take your time
Tonight

And then the world just got better
'Cause we were meant to be together
And then the world just got better
I see the look in your eyes
Let's just give it a try
And then the world just got better
We're gonna make this last forever
And then the world just got better
I see the look in your eyes
Let's just give it a try

Don't be shy
It's you and I
Tonight
Don't say goodbye
Take your time
Tonight

And then the world just got better
'Cause we were meant to be together
And then the world just got better
I see the look in your eyes
Let's just give it a try
And then the world just got better
We're gonna make this last forever
And then the world just got better
I see the look in your eyes

Let's just give it a try

Just got better baby

Got better, got better, got better

The world just got better
