

Kill Us

Jessie Reyez

Love you in the worst way
You knock me down like a heavyweight
We fell in love got a K.O., oh-oh no
Too damn young so we broke up, no-go
So much for a wedding date, hah

I know nobody gets outta love alive
We either break up when we're young
Or we say goodbye when we die
For a moment at least I know
You were mine and it was beautiful
But winter comes and roses don't survive

It's gettin' late
And I should go

But I wanna hold ya
Like it's June in the West End
Back when you were my best friend
Before love came to kill us
We're not supposed to
But I can't learn my lesson
I miss when you were my best friend
Before love came to kill us

So under the mask of the moon,
Could we dance in the past?
Before love
Before love came to kill us

Life's good and I'm gettin' paid
But I think about you everyday, oh no (still)
When I miss you I medicate (pour up drink, drink)
Tears come out like a renegade, ah-ah

'Cause nobody gets outta love alive
We either break up when we're young
Or we say goodbye when we die
For a moment at least I know
You were mine and it was beautiful
But winter comes and roses don't survive

It's gettin' late
And I should go

But I wanna hold ya
Like it's June in the West End
Back when you were my best friend
Before love came to kill us
We're not supposed to
But I can't learn my lesson (No, I can't)
I miss when you were my best friend (yes I do)
Before love came to kill us

So under the mask of the moon,
Could we dance in the past?
Before love

Before love

Under the mask of the moon,
Could we dance in the past?

Before love

Before love

Before love came to kill us
