

Wild

John Legend

I just bought a new car
One where the top goes down
So we can see the stars

I wanna take you so far
Out past the Saturn rings
And into my heart

I wanna drive you
Wild, wild, wild
I wanna love you
For miles and miles

We can go slow
We don't need to rush
I'll take the wheel, make you feel every touch

I wanna drive you
Wild, wild, wild

Lay on the passenger's side
Tell me how fast you want
We'll get there tonight

Oh, fire
You set me on fire
I swear you're the only one
I'd take on this ride

I wanna drive you
Wild, wild, wild
I wanna love you
For miles and miles

We can go slow
We don't need to rush
I'll take the wheel, make you feel every touch

I wanna drive you
Wild, wild, wild

Wanna love you, wanna touch you, wanna drive you
Oh, wanna love you, wanna touch you

I wanna drive you
Wild, wild, wild
And I wanna love you
For miles and miles

Oh, we can go slow
We don't need to rush
I'll take the wheel, make you feel every touch

I wanna drive you
Wild, wild, wild

Yeah, I wanna drive you

Wild, wild, wild
