

# You've Got a New Light Shining in Your Eyes

Johnny Cash

You've got a new light shining in your eyes  
And I can see now right where your beauty lies  
And it's showin' in your face that your heart has found a place  
And I can hear it in your whisper and your sighs

You've got a new way of doing things you do  
And it's plain to see there's been a change in you  
And I wonder could it be that the change is due to me  
For I have felt a certain something too

You've got a way about you now that you never had before  
You've got a look you're wearin' now like no look you ever wore  
I tried to hide it for a while but now I realize  
You've got a new light shining in your eyes

You've got a way about you now that you never had before  
You've got a look you're wearin' now like no look you ever wore  
I tried to hide it for a while but now I realize  
You've got a new light shining in your eyes

You've got a new light shining in your eyes
