What In The World

I can't deny the fact that I spend my time with you But lately even little s**t got me losin' my grip And there's something we gotta do Now either you stop going through my pockets late night Gettin' caught up in what you might find Baby I got love for you but I'ma have to fall back Even though you usually spend the night

What in the world, what in the world are we doing Spending so much time, what is it girl What in the world are we doing I guess all I know is that it's a beautiful thing to be loved A beautiful to give love, this is a beautiful thing But what in the world are we doing

Sometimes you got me feeling like I got a personal angel But I've learned from the past to keep my expectations low Cause don't you know what if feels like When you put all your faith in someone and they bounce Then you know what you know about love

Baby we need to take percautions

Things are heated up so fast Sometimes we let our emotions get the best of us The time it takes to get to where we are Such a short time it seems But what a long time indeed It's been a minute with you baby

What in the world, what in the world are we doing Spending so much time, what is it girl What in the world are we doing I guess all I know is that it's a beautiful thing to be loved A beautiful to give love, this is a beautiful thing But what in the world are we doing
