Bring Heavy Rock To The Land

We're on a mission for the rock This music carousel will shake and shock you We are the melody and rhyme The story must be told, it's in my mind yeah

A vision dancing to the grave This is the fire of the lonely brave ones Before our dreams fall out of time Until the end we raise the metal sign

Bring heavy rock to the land It's never over, the crown is in our hands forever Play rock and roll for every man The song is the tower, it feeds us the power.

Be the crusader and the rock of the road Follow your destiny don't fake your future Even winds can turn you blind Life it holds the pain to break and crack you

Before my heart runs out of breath Until the dawn of darkness And to my death I

Bring heavy rock to the land It's never over, the crown is in my hands forever Play rock and roll for every man This is the hour of magic and power The night is my tower - yeah

Oh, this life was never easy But it's fate I got to stay and deliver

Time, is there no end to all our crime It's crying in my mind So many countless centuries of sorrow Dark winds will haunt inside the new tomorrow

I'm on a mission for the rock This music carousel will shake and shock you We are the melody and rhyme The story must be told, it's in my mind - yeah

My vision dancing to the grave This is the fire of the lonely brave one Before our dreams fall out of time Until the end we raise the metal sign

Bring heavy rock to the land It's never over, there will always be a band that wants to Play rock and roll for every man The song is the power, it builds me the tower - yeah

(Bring heavy rock to the land) (Play rock and roll for every man)

Jorn

With the magic of the sun we will burn and run, yeah All you children of the night, we will rock all right Come on and rock, rock, rock.
