

# Heart of the Night

Juice Newton

Dark city streets, twist and moan in the heat as night descends  
Two searching eyes, cut their way into mine inviting me in  
Dancing so close, we already know how good it will be  
We slip out from the unseeing crowd, we find what we need

In the heart of the night, we run like bandits  
Two hungry hearts under the gun  
In the heart of the night when we find each other  
We're stealing love on the run  
In the heart of the night, heart of the night

The cool city moon lays its touch on the room, your eyes reach  
to me  
Two shadows fall saying nothing at all, we know what we need  
In the release two prisoners are free from all darkness  
One more escape, surviving the heartache and madness

In the heart of the night, we run like bandits  
Two hungry hearts under the gun  
In the heart of the night when we find each other  
We're stealing love on the run  
In the heart of the night, heart of the night

In the heart of the night when we find each other  
We're stealing love on the run  
In the heart of the night, heart of the night  
In the heart of the night, in the heart of the night
