Now Is Mine

My past, my future, my disease Perhaps collapse to make me seize A moment just a breeze Greatful, humble I allow These words to be the past somehow I wonder Am I here now Am I here now I feel, hear, see and it confuses me I am wrong I am here now Is mine I'll take it all around the world Take my future past, it's fine But now is mine My precious present, will you bloom To make this fourth dimension womb Stop asking. Stop asking why All I know is all I am Will never fully understand my breathing I try, how I try to feel, hear, see and it confuses me I am wrong I am here now Is mine

I'll take it all around the world Take my future past, it's fine But now is mine **K's Choice**
