

The Longest Year

Katatonia

In the nights of old I've always wished
In the longest year that had me down
And I would freeze if you ever asked me
That was my own way

Confront the guilt and try to overcome
Do not go away
I'm not there yet

Confront the guilt and try to overcome
Do not go away
I'm not there yet

I can see fire
But I fall behind
When I give up my thoughts redefine (will defy)
How cold is the flame
Of our compromising future
How cold is the sun

City lights are fading still
Becoming the sky so white
But I'm in the dark of this our new day
This is my own way

Find
This way will hold me down
How cold is the sun

I can see fire
But I fall behind
When I give up my thoughts redefine (will defy)
How cold is the flame
Of our compromising future
How cold is the sun
