We keep our head in the blazing light Let the rays shine through our mind Memories of never-ending days And the rush we can't escape

Always chasing a forever Where we will never see the Sun go down Always dreaming in December Of the moment that we have right now

So meet me under the midnight sun Meet me under the midnight sun

We lose our head in the Stockholm sky Black and blue under heart-pink nights Feel the freedom, we're wide awake From the cold, clear, coloured rays

Always chasing a forever Where we will never see the Sun go down Always dreaming in December Of the moment that we have right now

So meet me under the midnight sun Meet me under the midnight sun

So meet me under the midnight sun Meet me under the midnight sun
