## **I Will Follow**

You were in a dream I had Doing dishes at the laundry mat And then you smiled at me You said lets hide and seek I'm gonna count to three Where did you go

One step forward two steps back So funny I forgot to laugh You lead me down the garden path And I will follow I will follow

I saw you on a downtown street Eating peaches in an apple tree You said take my hand We'll be a marching band They'll love us in Japan Where did you go?

One step forward two steps back So funny I forgot to laugh You lead me down the garden path And I will follow I will follow
