

# We'll Always Have Each Other

Kenny Rogers

Girl, I may never get to buy you a diamond ring  
And baby, baby do lots of fancy things  
But what we got is worth a lot more than gold  
Because we got our love to have and to hold  
We'll always have each other  
Yes, we'll always have each other

Now we may never ride out in a limousine  
And have a kind of rich you ever seen  
But what we've got way down here in our hearts  
The kind of rich as honey they'll have to tear apart  
We'll always have each other  
Yes, we'll always have each other

So love and companionship, so they say  
May sometimes die and even fade away  
But that's not so, little darlin' don't you see?  
As long as I've got you and baby you got me  
We'll always have each other  
Yes, we'll always have each other

So love and companionship, so they say  
May sometimes die and even fade away  
But that's not so, little darlin' don't you see?  
As long as I've got you and baby you got me  
We'll always have each other  
Yes, we'll always have each other
