

## Stepped Right in It

Kim Carnes

I stop for every traffic sign  
Can't ever be too cautious  
Always walking that straight line  
Doing everything I ought to  
Never knew what I was missing  
'Til my heart started talking  
And I started listening

Then I stepped right in it, just like that  
Put my best foot forward and I never looked back  
Good as gone, fit like a glove  
I wasn't even looking for love  
I just stepped right in it

Love ain't a matter of exact science  
Can't predict where it's going  
Sooner or later, you take a chance  
And show that hand you're holding  
Now don't be thinking about quitting the race  
'Cause love takes time, love don't wait

Then I stepped right in it, just like that  
Put my best foot forward and I never looked back  
Good as gone, fit like a glove  
I wasn't even looking for love  
I just stepped right in it
