

Lights Down Low

Kim Wilde

I know where this could lead
Just how good it could be
I'll show you all of me
What you get is what you see

With every breath you breathe in me stronger
Every connection leading me under
One more confession leading another
I'm meant for you and you're made for me so

Tie your arms around me
Blame it on the lights down low
Higher than the stars around me
Stay the night and save my soul
Dry the tears that drown me
Say you'll never let me go
Stay the night we can last forever

I'll go call it through
If you'd say you want me to
I'll slow it down to you
Make a wish I'll make it true

With every breath you breathe in my lung but
Every caress you're leading me under
One last confession who needs another
I'm meant for you and you're made for me so

Tie your arms around me
Blame it on the lights down low
Higher than the stars around me
Stay the night and save my soul
Dry the tears that drown me
Say you'll never let me go
Stay the night we can last forever

Tie your arms around me
Blame it on the lights down low
Higher than the stars around me
Stay the night and save my soul
Dry the tears that drown me
Say you'll never let me go
Stay the night we can last forever
