

## The Indians

### King Missile

The Indians lived all over this land before we came and killed them  
That was very bad of us  
We thought we needed the land  
But for the most part  
We just ruined it anyway  
And now, nobody can use it  
That's the way we are  
We're pigs

One of my favorite foods to eat is called corn  
The Indians call it "maize"  
We call the Indians "Indians"  
This is because Columbus thought he was in India  
When he first came to this land

Some people say we should call the Indians "Native Americans"  
'Cause they were here in America before us  
But before us, this land wasn't called "America"  
It was named "America" by a mapmaker who never even came here  
He just lived in Europe  
And made maps and when he found out about this land  
He just made a map of it  
And just put his name on it  
'Cause he could  
That's the way we are  
We're pigs

As I was writing this  
A cockroach fell from the sky and onto the table  
I killed it  
'Cause I did  
That's the way I am

This doesn't really have very much to do with the Indians, though  
I guess I got kind of sidetracked  
Anyway, I hope you see my point
