

Stuck in Our Ways

Knuckle Puck

Holding on to all things useless
The more I wake the more my mind slips away
'Cause every gateway drug and codependency
Leaving short gaps in history

Will we ever come back down?
Will we ever come back?

One foot under the grave
And it feels so safe
And we're still stuck in our ways
We trace it all back to
A break in the big wave
Addicted to everything
I'm missing everything

I wish I could but it's so hard to
Articulate obscure correlations
While the sounds keep crashing down
Like a symphony
In perfect harmony

Will we ever come back down
Will we ever come back
We have smoked out all summer long
Will we ever come back down

One foot under the grave
And it feels so safe
And we're still stuck in our ways
We trace it all back to
A break in the big wave
Addicted to everything
Oh we don't want to sink

All we just do is hide

One foot out of the grave
And it feels so safe
But we're still stuck in our ways
We trace it all back to
A break in the fake line
It's just everyday
We've missed everything

One foot out of the grave
And it feels so safe
But we're still stuck in our ways
We trace it all back to
A break in the fake line
It's just everyday
Oh we don't want to die
So when we're all out of time
