

# Autopilot

Kodamine

I'm trying to connect with you  
To see the world the way you do  
Try and understand what's in your head  
I'm hearing what you said

'Cause I wanted to say  
When I see you this way  
Don't ever let it break your heart  
I'll go back to the start  
I'll watch you fall apart

Feels like an empty space  
You don't enjoy the taste  
I just need a place to hide  
Somewhere to make you right  
If this isn't what you want  
Head back to your own haunt  
And you'll find a missing piece  
Or just a big relief

Maybe you lost control  
Fallen into a hole  
The way that it was before  
It's all that you're looking for  
You just need to take a step back

This autopilot kicking in  
You're feeling like you'll never win  
Hey, maybe I can help you out  
Don't fall into your doubts  
I hear you screaming out

Feels like an empty space  
You don't enjoy the taste  
I just need a place to hide  
Somewhere to make you right  
If this isn't what you want  
Head back to your own haunt  
And you'll find a missing piece  
Not just a big relief

Maybe you lost control  
Fallen into a hole  
The way that it was before  
It's all that you're looking for  
A lover is all you need  
Someone that you can read  
Day in and day out  
Means this one is all, all about

Somebody you need  
Somebody you need  
Somebody you need  
Somebody you need

Feels like an empty space  
You don't enjoy the taste

I just need a place to hide  
Somewhere to make you right  
If this isn't what you want  
Head back to your own haunt  
And you'll find the missing piece  
Somebody that you need

Somebody you need  
Somebody you need  
Somebody you need  
Somebody you need  
Somebody you need  
Somebody you need
