

# September Love

Kool & The Gang

When we were you - and so naive  
Emotions turned - in our hearts  
When love was young - we promised and believed  
In one love - and our dreams

Couldn't save it girl oh no  
Time put us worlds apart and out of control  
But I love you now as always  
Woman those memories live inside me every day

Oh how I remember [I still remember September love]  
In the heat of the night [I still remember September  
dreams]  
When the love bites [Do you remember our September  
song]  
And I want your love right now [I still remember  
September love]  
[September Love]

Passions would flow - when love was won  
Endlessly and everlasting  
Yes we have grown from this love we've known  
And our dreams - never lasting

Couldn't save it girl oh no [How I remember your face]  
Time put us worlds apart and out of control  
That love song made just for us  
Woman those memories live inside me every day

Oh how I remember [I still remember September love]  
In the heat of the night [I still remember September  
dreams]  
When the love bites [Do you remember our September  
song]  
Such a lovely song [I still remember September love]  
Oh yeah

September's gone  
September song  
And I wanna hold you near me right now

[I still remember September love]  
In the heat of the night [I still remember September  
dreams]  
When the love bites [Do you remember our September  
song]  
And I need your love right now [I still remember  
September love]

When I held you close to me.....
