

Feels Like Forever

Kygo

I felt the pull of the night
Calling from some greater meaning
There was guiding lights pulling me
Closer to an end tonight

I saw you standing there like
Something from a dream calling to me
I knew there was
No time to be wasting

I asked if I knew you 'cause I
Felt a pull, from some greater feeling
That took hold of me in that moment
And I know it's childish of me
To think such things, to say such things
But this really feels like forever tonight

'Cause I'd walk a million miles
Just to know your name
I know you said you felt love before
This ain't the same
And I can't let you go
'Cause this feels like forever
Oh
It feels like forever tonight

It feels like forever tonight
It feels like forever tonight
It feels like forever tonight
(It feels like forever tonight)
It feels like forever tonight

We took a taxi out under those city lights
Chasing dreams on a dime
There was no time to be wasting
She said, "Don't you say those words
'Cause I think I feel the same"
I just stood there laughing
She was dancing in the rain

She said, "Have you ever felt like you been waiting your whole life
Just for one moment
Now just for one moment"
She said, "Have you ever felt like you been waiting your whole life
Just for one moment
This really feels like forever"

'Cause I'd walk a million miles
Just to know your name
I know you said you felt love before
This ain't the same
And I can't let you go
'Cause this feels like forever
Oh
It feels like forever tonight

Walk a million miles

Just to know your name
I know you said you felt love before
But this ain't the same
And I can't let you go
'Cause this feels like forever
Oh
It feels like forever tonight

It feels like forever tonight
It feels like forever tonight
It feels like forever tonight
(It feels like forever tonight)
It feels like forever tonight
It feels like forever tonight
