Face Down

Live form Hollywood, the original L.A. Guns It's true we walk in disbelief Clutching to our faded glory Trust in me but I'm a thief Get down on your knees before me

Worlds collide, hate fills my mind Tension rising, no surrender The street's a place where love is dying All hail to thee thy legal tender

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down, so

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down

At night the vipers rip my flesh The bitch from hell is feeding Scratch my wounds to keep them fresh She likes 'em young 'n bleeding

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down

Greed and hate, fear and shame Wasted our disaster Cuts like cancer in my brain Man, now he's your master

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down

Now you're gonna end up face down Now you're gonna end up face down Now you're gonna end up face down
