

# Infection

Lacuna Coil

(It's coming down)  
I'm in your blood and like a poison in your veins  
And small amounts I'm killing you slowly  
(Tell me why)  
You cannot face me when I'm staring straight at you  
You cannot hide 'cause I will haunt you

We're falling down into a grave  
When all the trust has gone away  
Now take this life and pull the trigger  
Stop my pain

It's crashing down the sound of thunder  
The lightning strikes and makes me blind  
You drag me down and pull me under  
Until you see me drown

(Bring me down)  
Just like a drug I slow you down and make you numb  
I got you high, I laid you so low  
(I cannot move)  
You're paralyzed with all my strength I'm hurting you,  
You sleep me awake it's like a bad dream

We're falling down into a grave  
When all the trust has gone away  
Now take this life and pull the trigger  
Stop my pain

It's crashing down the sound of thunder  
The lightning strikes and makes me blind  
You drag me down and pull me under  
And spread around like a deadly infection

It's crashing down the sound of thunder  
The lightning strikes and makes me blind  
You drag me down and pull me under  
Until you see me drown

It's crashing down the sound of thunder  
The lightning strikes and makes me blind  
You drag me down and pull me under  
Until you see me drown

Drag me down and pull me under  
Drag me down until you see me drown
