Slip out the door and fly I'm lost in time I hover as an angel, I hover

Embracing all myself I reel through the storm that is shaking me I don't know where I don't know why I know I'm not going to fall

And butterflies are flying (fly away) right beside me as I ascend to the clouds

No, I won't delay no, I won't delay time is like a knife for me now I just won't delay

Time is mine
I got the blade
change your mind
I'll make you stay

Butterflies are flying and I just won't delay
