

## Startup Chime

Ladytron

School holiday that she could do without  
A weekend break that slept in late  
A beach resort under a year of rain  
This is where it has to start

When the AC hum inside your sleepy head  
Drowns the startup chime inside your heart  
Technology is there to cure yourself  
This is where it has to start

Unfamiliar brand falls from an empty shelf,  
Without sounding an alarm,  
The test results tell you nothing at all  
This is where it has to start

When the AC hum inside your sleepy head  
Drowns the startup chime inside your heart  
Technology is there to cure yourself  
this is where it has to start

The Northern Lights are just a band for hire  
Playing class reunions without end  
The test results tell you nothing at all

Technology is there to cure yourself

A dusty cartridge from the VCs is on the way to see old friends  
This is where it has to start
