

We Fall in Love

Lamb

Face to face
One to one
Two hearts race
All is lost and won

Air to air
Light to light
All laid bare
Senses taking flight

It all begins
When stars align
And two paths meet
To re-define
We fall in love
We fall in love
We fall in love
It all begins
When stars align
And two paths meet
To re-define
We fall in love
We fall in love
We fall in love

Flame to flame
Dust to dust
We became
Tenderness and trust

It all begins
When stars align
And two paths meet
To re-define
We fall in love
We fall in love
We fall in love
It all begins
When stars align
And two paths meet
To re-define
We fall in love
We fall in love
We fall in love

(We fall in love)

It all begins
We fall in love
