

## Out Of My System

Larry Norman

The switch is off, the lights are out, It took no special wisdom  
To pull the plug and cut the wires And now you're out of my system.

It took me years to change the gears I could barely twist 'em.  
But you're gone, the tears have dried Now you're out of my system.

You're out of my, you're out of my system. You're out of my, you're out of my system.

You led me on with words of love I just couldn't resist 'em. You never meant those things you said (that's all right) You're out of my system.

You're out of my, you're out of my system. You're out of my, you're out of my, You're out of my, you're out of my system.

You disappear until the morning light So many alibis I can't list 'em. I used to lie awake at night Now you're out of my system.

You ran around with other men Ooh, you made love and kissed 'em. But now you're gone, do what you want You're out of my system.

You're out of my, you're out of my system. You're out of my, you're out of my system.
