

Peace Love & Country

Lee Kernaghan

The sun falls on your face
I can see you now
I can feel you now
Girl I'm comin' round
And bein' here with you
Is all I wanna do
When the sunset paints the land
Some kind of beautiful

We got peace, out here in the country
The way that you love me
Is gonna see us through
I can see clearly, everything's gonna be alright
Cause we got peace, we got love,
And country

Been out there in the rain
It's been comin' down
I been wonderin' how
We'd reach higher ground
Got an old six string an' I'll try to sing you
A song or two
I wanna thank you girl, for showing me a better way

We got peace, out here in the country
The way that you love me
Gonna see us through
I can see clearly, everything's gonna be alright
Cause we got peace, we got love,
And country

We found peace
We found love
Might have had a little help from up above

We got peace, out here in the country
The way that you love me
Gonna see me through
I can see clearly, everything's gonna be alright
Cause we got peace, we got love,
And country
