Oh Mississippi

Oh mighty river The Mississippi Turbulent waters Lull me to sleep

Please take my hand I will go gently Your arms around me You'll be my man

The leaves are changin' I cross this road To make my last walk In that warm sunshine

Oh mighty river Oh Mississippi Oh all the troubles your banks have seen

Carry these stories from north to south But round these parts you're westward bound

The factories closin' Kids have grown so fast Lift up their woe please As you flow past

Oh witness river You have seen it all Now do your waters Have room for one more

Oh endless river As you transcend Please take me with you Far from this land
