

Walk on Water

Loretta Lynn

Superman used to fly when we were kids
And in my mind, I'm the girl he did it for
Oh, but now we're grown and we know the way it is
No one waits for superheroes anymore

You, you make me want to walk on water
And I believe I could do it for you
You make me want to walk on water
Oh I know you love me for the simple little things I do

It's a miracle, this love that we both share
And God knows I'm thankful and that's enough
And maybe it's [?] or a prayer
But think we could move mountains with our love

You, you make me want to walk on water
And I believe I could do it for you
Baby you, you make me want to walk on water
Oh I know you love me for the simple little things I do

Oh I know you love me for the simple little things I do
