Don't Talk to Me About Work

Lou Reed

A perfect day to get out of bed shower, dress, shave, kiss you on the head Then I hit the office and my head starts to swim

A perfect day to just walk around see a violent movie, check the sounds
But even on the street
when I hear a phone ring my heart starts to beat when I get home I don't want you to speak

Don't talk to me about work please don't talk to me about work I'm up to my eyeballs in dirt with work, with work

How many dollars, how many sales how many liars, how many tales How many insults must you take in this one life

I'm in prison most of the day so please excuse me, if I get this way But I have got obligations to keep so be very careful when you speak

Don't talk to me about work please don't talk to me about work I'm up to my eyeballs in dirt with work, with work

Please don't talk to me about work don't you talk to me about work I'm up to my eyeballs in dirt with work, with work

Don't talk to me about work don't you talk to me about work Don't you talk to me about work please don't talk to me about work

Don't you talk to me about work please don't talk to me about work Don't you talk to me about work please don't talk to me about work Don't you talk to me about work please don't talk to me about work ...
