

Name in Lights

Lucky Boys Confusion

You and me are targets
Everybody gets a shot
Baby, we're an easy kill
But can we be bought?
Packaged in a warehouse
New identity
Why wasn't it enough to be
Just me?

I took ten shots at the half moon
Thinking I could reach those heights
I lost sight of the target
I've got my name in lights

Standing at the station
Waiting for my chance
Imagining the smoke and lights
And watching them dance
Is this self-deception?
I'm trying to believe
But isn't it enough to be
Just me?

I took ten shots at the half moon
Thinking I could reach those heights
I lost sight of the target
I've got my name in lights
So take ten shots at the half moon
Remember not to fall in love
'Cause half the fun's the chase, kid
You'll get your name in lights
You'll get your name in lights

You'll get your name in lights

Ambition's gonna eat you alive
So raise your glasses up and say your goodbyes
You'll grow darker for the warmth of the light
Hurry up and wait, it's time to plan your disguise
Ambition's gonna eat you alive
So raise your glasses up and say your goodbyes
You'll grow darker for the warmth of the light
Hurry up and wait, they're gonna eat you alive
They're gonna eat you alive

I took ten shots at the half moon
Thinking I could reach those heights
I lost sight of the target
I've got my name in lights
So take ten shots at the half moon
Remember not to fall in love
'Cause half the fun's the chase, kid
You'll get your name in lights
You'll get your name in lights

You'll get your name in lights
You'll get your name in lights

You and me are targets
