

Captain America

Magnum

The scarlet witch ain't going to help you tonight
The human torch has gone and put out his light
The god of thunder that we all know as Thor
Has lost his hammer and is feeling quite sore

Where is the star man to help all his friends?
He can't be back 'cause his fight never ends

Black eagle seems that he will sure get his way
I feel concerned about the USA
The ice man has melted and the angel has flown
But are we going to fight this villain alone

Where is the star man to help all his friends?
He can't be back 'cause his fight never ends

Pack up your money, move right away
The king is coming, he's arriving today
He can attract America when he likes
Black Panther doesn't have the strength or the might

Hold on a minute, what is this that I can see?
Captain America is all right by me
We got no worries now I know he's all right
I feel much better now that I sleep at night

Here comes the star man to help all his friends
I knew he'd come or the books would just end

Here comes the star man to help all his friends
I knew he'd come or the books would just end

Here comes the star man to help all his friends
I knew he'd come or the books would just end
